## What's New

- 2Q19 DPU of 0.93Scts as expected
- Acquisition of Australian chemical distributor Ixom completed in 1Q19, contributes to cash flows
- Successful equity fund raising exercise followed by perps issue demonstrates healthy investor demand
- Maintain BUY with TP of S\$0.58

## Ability to raise capital a plus

Fund raising successful; maintain BUY. Keppel Infrastructure Trust (KIT) maintained its record of steady DPU of 0.93 Scts in 2Q19, as expected, on the back of healthy distributable cash flows for the quarter. KIT has recently completed the acquisition of Australian chemical distributor lxom, and subsequent rounds of equity fund raising (EFR) exercise of around S\$500m and perpetual securities issue worth S\$300m to fund the acquisition has been well accepted by investors. This is significant in securing long term visibility of distributions for KIT. To recap, many of KIT's assets derive revenue from availability-based payments, independent of actual offtake. Hence, cash flows are predictable and not significantly exposed to economic cycles.

Where we differ. We believe the Trust is sufficiently protected from troubles at Basslink, which is in the midst of arbitration proceedings against its counterparties related to a 6-month outage in 2016. We expect that even in the worst case scenario, KIT should not be liable to pay any damages as any claims against Basslink are ring-fenced at the Basslink level. In any case, KIT does not depend on cash flows from Basslink for current distributions, and project loans are also non-recourse to KIT. We ascribe zero value to Basslink in our valuations for KIT, hence the negative newsflow from Basslink is an irritant at best and does not affect KIT's fundamentals.

**Potential catalyst.** The fund raising exercises have strengthened KIT's balance sheet and broadened investor base, and a successful integration of Ixom should lead to better investor perception and future yield compression for the stock.

#### Valuation:

Based on our DDM-based valuation methodology (cost of equity: 6.7%), we derive a valuation of \$\$0.58 per share. The Trust is currently trading at a healthy yield of 7.4%.

## **Key Risks to Our View:**

Key risks include (i) plants not meeting availability thresholds owing to operational issues, (ii) increasing debt refinancing risks for the asset portfolio as the assets age, and (iii) exposure to increases in inflation and interest rates.

#### **WHAT'S NEW**

#### 2Q19: another steady quarter

**2Q19 distribution in line.** Keppel Infrastructure Trust (KIT) declared DPU of 0.93Scts for 2Q19, in line with previous quarters. Group revenue was not comparable as the Ixom acquisition was completed on 19 February 2019, and this was the first full quarter contribution from Ixom, which accounted for \$\$249m revenues out of Group revenues of \$\$418m for the quarter (up 193% y-o-y and 31% q-o-q due to the acquisition).

Distributable cash flows for 2Q19 slightly lower than expected at S\$45.8m. Excluding Ixom, distributable cash flows would have been S\$35.6m, in line with usual run rate and at par q-o-q. City Gas contributions normalised after a strong 1Q19. City Gas earnings tend to lag the movements in underlying fuel prices but the effect will smoothen out over time though. Cash flows from other key assets including KMC power plant and the water and waste treatment assets remained stable. Ixom generated around S\$10.2m of distributable cash flows, which was slightly lower than our expectation of around S\$13m for the quarter, likely due to timing issues. For the approximate 1-month 10-day period under KIT in 1Q19, Ixom had generated distributable cash flows of S\$5.9m. Earnings and cash flows for Ixom are expected to improve in subsequent quarters as they are seasonally stronger in second half of the year. This will form a strong support for KIT's overall distributions.

Successful perpetual securities issue follows recent equity fund raising (EFR) exercise. To recap, KIT recently completed an EFR exercise – to partially finance the acquisition of lxom – by raising approximately \$\$500.8m via Placement as well as a Preferential Offering. As part of continuing prudent capital management efforts, KIT further established a \$\$1 billion multicurrency debt issuance programme on 23 May 2019 to diversify the Trust's funding sources. In June 2019, KIT successfully raised a total of \$\$300m 4.75% perpetual securities (callable in 2029) in two tranches. The first tranche of \$\$200m was well-received by investors, and enquiries for additional demand led management to issue a second tranche of \$\$100m.

**Trust on a firm footing for the future.** We believe this demonstrates investors' confidence towards KIT's credit profile and long-term cash flow sustainability. With the issue of the perpetual securities, the remaining bridge loan taken

to finance the acquisition of Ixom has now been fully repaid, and a portion of KIT's Trust level borrowings have also been repaid. This improves the Trust's gearing profile as well.

Basslink arbitration continues, timeline still uncertain. Basslink continues to maintain its position that the Basslink Interconnector failure, which led to a six-month outage in 2016, was a Force Majeure Event under the Basslink Operations Agreement and Basslink Service Agreement and strongly denies all allegations made by the State of Tasmania and Hydro Tasmania, who are its counterparties. Basslink is vigorously defending itself in the arbitration, through which it hopes to recover the withheld amounts from Hydro Tasmania. While management believes that proceedings could be completed by end-2019, we believe this could drag on for longer.

We believe KIT is sufficiently ring-fenced from troubles at Basslink. We believe the Trust is sufficiently protected from ongoing issues at Basslink. Basslink has around A\$694m outstanding borrowings, which mature in November 2019. Basslink is currently negotiating a Long Term Financing Plan with its banking syndicate, but there is no agreement yet. There is no contractual recourse though to KIT under the project financing arrangements. As far as arbitration proceedings go, even in the worst case scenario, KIT should not be liable to pay any damages as any claims against Basslink are ring-fenced at the Basslink level. In any case, KIT does not depend on cash flows from Basslink for current distributions, and project loans are also non-recourse to KIT. We ascribe zero value to Basslink in our valuations for KIT, hence any negative newsflow from Basslink is an irritant at best and does not affect KIT's fundamentals.

Maintain BUY with unchanged TP of \$\$0.58. We believe the lxom acquisition is a step in the right direction by KIT's management as it diversifies the asset base, stabilises NAV decline, lengthens the effective life of the Trust, and creates organic growth potential which was largely missing till now. With an enhanced asset base and stronger balance sheet, we look forward to further acquisition trajectory. Dividend yield has compressed to around 7.4% currently, but we believe there is room for further yield compression, especially amid dovish interest rate scenario currently.

#### CRITICAL DATA POINTS TO WATCH

#### **Critical Factors**

Positioned as the premier Singapore infrastructure-focused Business Trust. Keppel Infrastructure Trust (KIT) has an asset base of more than S\$4bn. Recently acquired Australian chemical distributor Ixom, the Keppel Merlimau Cogen (KMC) power plant and CityGas represent some of the larger assets in the Trust's portfolio. The portfolio is quite diversified across gas, electricity, water and waste management assets.

Availability-based payments lend stability to EBITDA and distributions. Many of the assets derive revenue from availability-based payments, independent of actual demand. Hence, revenue should be largely stable over the next two years. The key cost components for the Trust will be energy expenses, staff costs, operation & maintenance costs and other professional fees. Apart from City Gas, most of the volatile costs – energy expenses – are passed through. Ixom's margins are also very stable due to cost pass through distribution contracts. Thus, margins should be fairly predictable. Cash flow available for distributions to unitholders is calculated as adjusted EBITDA less cash tax, cash interest expenses, maintenance capex and payout to minorities. Ixom is expected to add around \$\$140m in additional EBITDA by FY20 and distributions to unitholders are expected to be maintained at around 3.72Scts per year.

Development opportunities exist as well. The Trust's management is also willing to consider development opportunities if risks are controlled, and returns to shareholders can be enhanced within a reasonably short time frame. Coinvestment opportunities with Sponsor Keppel Infrastructure (KI) tie in nicely with such a strategy, as the Trust can acquire a portion of mature assets from KI, like the KMC deal.

Scale creates acquisition opportunities. Following the recent equity fund raising exercise, the Trust has more means to consider inorganic growth. The ROFR option provided by KI to the Trust presents the easy targets in the near to medium term. But management could well go beyond the ROFR pipeline and evaluate third-party options in sectors like energy, telecoms, water and waste management. KIT recently acquired the Australian chemical distribution company Ixom, and similar opportunities will be evaluated in future as well.

**Upside from possibility of asset life extensions.** The Trust has some assets with contract extension options in place. Some of the other assets, despite not having such options in place, are relatively young and in our view, stand a good chance for contract renewal when the time comes. This has not been factored into our valuations as yet.

#### **Balance Sheet:**

Balance sheet leaves some headroom for growth. Current gearing levels are not overly aggressive for a utility asset owner, in our view. After the Ixom acquisition, EFR exercise and perps issue, net leverage (net debt/ asset) can reach around 0.43-0.44x and net debt/adjusted EBITDA will improve to around 5.5x by end-FY20, based on our estimates. Hence, the enhanced scale post Ixom acquisition should leave more headroom in future for the Trust to look at M&A opportunities. Note that we consider the perpetual securities as debt and not equity in our estimates.

#### **Share Price Drivers:**

Acquisitions essential from time to time. The premise for combining two existing listed Trusts was to give management more ammunition to pursue accretive acquisitions. Given that organic growth potential was low in the concession assets, investors will continue to look closely at management's ability to ensure acquisitions deliver as expected as well as execute on further M&A promise.

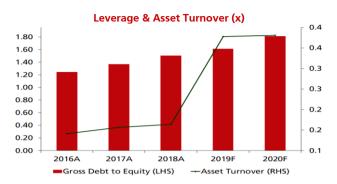

#### **Key Risks:**

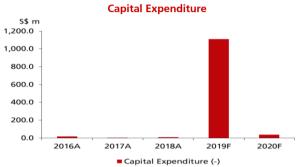

**Key investment risks**. We see four key risks: (i) inability to secure financing at reasonable costs of funding for M&A activities, ii) plants not meeting availability thresholds owing to operating issues, (iii) increasing debt refinancing risks for the asset portfolio as the assets age, and (iv) exposure to increases in inflation and interest rates over time.

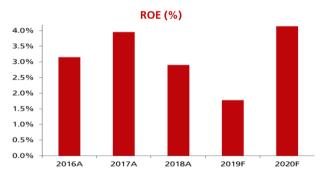

Basslink outage issues remain, but no immediate impact on DPU. The Basslink Interconnector suffered an undersea cable fault owing to which availability was affected between 20 December 2015 and 13 June 2016. Basslink believes this is a force majeure event, but offtaker Hydro Tasmania disagrees. The State of Tasmania is also demanding indemnification for losses to the tune of A\$100m. Thus, Basslink has now referred the dispute for arbitration and will need to also renegotiate its long-term project debt with its banking syndicate. This event however has no impact on KIT's distributions as Basslink has not been contributing to distributable cash flows for a while and is not expected to do so in the near future either.

#### **Company Background**

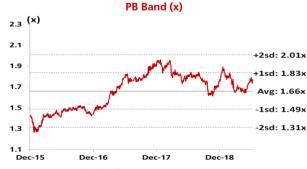

Keppel Infrastructure Trust (KIT) is the largest infrastructure-focused Singapore business trust, deriving long-term predictable cash flows from a diversified portfolio of assets in key strategic areas – energy, distribution & network, and water and waste related infrastructure – in Singapore and Australia.

Source: DBS Bank Analyst: Suvro Sarkar

DBS Bank recommendations are based on an Absolute Total Return\* Rating system, defined as follows:

STRONG BUY (>20% total return over the next 3 months, with identifiable share price catalysts within this time frame)

BUY (>15% total return over the next 12 months for small caps, >10% for large caps)

HOLD (-10% to +15% total return over the next 12 months for small caps, -10% to +10% for large caps)

**FULLY VALUED** (negative total return, i.e., > -10% over the next 12 months)

SELL (negative total return of > -20% over the next 3 months, with identifiable share price catalysts within this time frame)

\*Share price appreciation + dividends

#### GENERAL DISCLOSURE/DISCLAIMER

This report is prepared by DBS Bank Ltd. This report is solely intended for the clients of DBS Bank Ltd, its respective connected and associated corporations and affiliates only and no part of this document may be (i) copied, photocopied or duplicated in any form or by any means or (ii) redistributed without the prior written consent of DBS Bank Ltd.

The research set out in this report is based on information obtained from sources believed to be reliable, but we (which collectively refers to DBS Bank Ltd, its respective connected and associated corporations, affiliates and their respective directors, officers, employees and agents (collectively, the "DBS Group") have not conducted due diligence on any of the companies, verified any information or sources or taken into account any other factors which we may consider to be relevant or appropriate in preparing the research. Accordingly, we do not make any representation or warranty as to the accuracy, completeness or correctness of the research set out in this report. Opinions expressed are subject to change without notice. This research is prepared for general circulation. Any recommendation contained in this document does not have regard to the specific investment objectives, financial situation and the particular needs of any specific addressee. This document is for the information of addressees only and is not to be taken in substitution for the exercise of judgement by addressees, who should obtain separate independent legal or financial advice. The DBS Group accepts no liability whatsoever for any direct, indirect and/or consequential loss (including any claims for loss of profit) arising from any use of and/or reliance upon this document and/or further communication given in relation to this document. This document is not to be construed as an offer or a solicitation of an offer to buy or sell any securities. The DBS Group, along with its affiliates and/or persons associated with any of them may from time to time have interests in the securities mentioned in this document. The DBS Group, may have positions in, and may effect transactions in securities mentioned herein and may also perform or seek to perform broking, investment banking and other banking services for these companies.

Any valuations, opinions, estimates, forecasts, ratings or risk assessments herein constitutes a judgment as of the date of this report, and there can be no assurance that future results or events will be consistent with any such valuations, opinions, estimates, forecasts, ratings or risk assessments. The information in this document is subject to change without notice, its accuracy is not guaranteed, it may be incomplete or condensed, it may not contain all material information concerning the company (or companies) referred to in this report and the DBS Group is under no obligation to update the information in this report.

This publication has not been reviewed or authorized by any regulatory authority in Singapore, Hong Kong or elsewhere. There is no planned schedule or frequency for updating research publication relating to any issuer.

The valuations, opinions, estimates, forecasts, ratings or risk assessments described in this report were based upon a number of estimates and assumptions and are inherently subject to significant uncertainties and contingencies. It can be expected that one or more of the estimates on which the valuations, opinions, estimates, forecasts, ratings or risk assessments were based will not materialize or will vary significantly from actual results. Therefore, the inclusion of the valuations, opinions, estimates, forecasts, ratings or risk assessments described herein IS NOT TO BE RELIED UPON as a representation and/or warranty by the DBS Group (and/or any persons associated with the aforesaid entities), that:

- (a) such valuations, opinions, estimates, forecasts, ratings or risk assessments or their underlying assumptions will be achieved, and
- (b) there is any assurance that future results or events will be consistent with any such valuations, opinions, estimates, forecasts, ratings or risk assessments stated therein.

Please contact the primary analyst for valuation methodologies and assumptions associated with the covered companies or price targets.

Any assumptions made in this report that refers to commodities, are for the purposes of making forecasts for the company (or companies) mentioned herein. They are not to be construed as recommendations to trade in the physical commodity or in the futures contract relating to the commodity referred to in this report.

DBSVUSA, a US-registered broker-dealer, does not have its own investment banking or research department, has not participated in any public offering of securities as a manager or co-manager or in any other investment banking transaction in the past twelve months and does not engage in market-making.

#### ANALYST CERTIFICATION

The research analyst(s) primarily responsible for the content of this research report, in part or in whole, certifies that the views about the companies and their securities expressed in this report accurately reflect his/her personal views. The analyst(s) also certifies that no part of his/her compensation was, is, or will be, directly or indirectly, related to specific recommendations or views expressed in the report. The research analyst (s) primarily responsible for the content of this research report, in part or in whole, certifies that he or his associate does not serve as an officer of the issuer or the new listing applicant (which includes in the case of a real estate investment trust, an officer of the management company of the real estate investment trust; and in the case of any other entity, an officer or its equivalent counterparty of the entity who is responsible for the management of the issuer or the new listing applicant) and the research analyst(s) primarily responsible for the content of this research report or his associate does not have financial interests<sup>2</sup> in relation to an issuer or a new listing applicant that the analyst reviews. DBS Group has procedures in place to eliminate, avoid and manage any potential conflicts of interests that may arise in connection with the production of research reports. The research analyst(s) responsible for this report operates as part of a separate and independent team to the investment banking function of the DBS Group and procedures are in place to ensure that confidential information held by either the research or investment banking function is handled appropriately. There is no direct link of DBS Group's compensation to any specific investment banking function of the DBS Group.
